Architects & Interior Designers

## TESTIMONIAL

Once a Designer has worked with Shilpi Designers, it is near impossible to work with other Interior Vendors. The smallest detail is adhered to, and if the output can be better with some changes, they will leave no stone unturned to satisfy the Designers craving for the perfect outcome.

We have over the years worked with them on Retail projects like Raymond, Titan, Jade Blue, Furla, etc. to name a few, along with a host of residential and Corporate office projects like Nike etc.

After being associated for more than a decade, they can pre-empt our requirements and have saved us a lot of time, money and effort. Their efforts translate into a having projects completed ahead of time, if not in time, and have saved the clients a lot of money and time. The indirect opportunity costs that ail the Retail sector, have never affected any project that Shilpi Designers has associated with us on.

On the Residential works, their effort in product and material selection has been exemplary. They take the time to listen to the client requirements and cater to the finest and smallest requirements. Have to mention that they take care of all finishes down to the last coat hook and picture nail.

Hats off to Shilpi Designers and we wish them the very best. We hope our association continues for a very long time and remains as problem free as it has over the years.
